TECHNICAL SKILLS

SQL (advanced) Python (Pandas, NumPy)

ETL & Data Pipelines

Data Quality & Validation

REST APIs & Integrations

Power BI

Tableau

Advanced Excel

AWS

Agile Methodologies

SOFT SKILLS

Analytical Thinking

Problem Solving

Client Communication

Technical Documentation

Teamwork

Results-Oriented

LANGUAGES

English Native / C1+
Spanish Native

CERTIFICATIONS

- ✓ Cambridge First Certificate (FCE)
- ✓ IGCSE – 8 subjects (Business, English, ICT)
- ✓ KET & PET – University of Cambridge

CLEMENTE CIFUENTES

DATA ANALYST · SQL · PYTHON · ETL · DATA QUALITY

Data Analyst working with data since 2020, with hands-on experience turning **real, messy data into clean, validated datasets**: migrated a law firm's case tracking from unstructured spreadsheets into its **first SQL database**, and currently build and run **ETL pipelines with Python and SQL** over connected-fleet data, acting as **my own QA** on every dataset delivered to management. Final-year student in Technology Management (UNICEN). **Native-level English** (Cambridge certified, US exchange program in Minneapolis) — fully comfortable joining client conversations with US teams.

WORK EXPERIENCE

Data Analyst – Connected Solutions

Feb 2023 – Present

JOHN DEERE DEALERSHIP · RURAL CERES · AGTECH

- Build and maintain **data transformation workflows in Python and SQL** ingesting REST APIs (OAuth2), standardizing inconsistent source data into clean reporting models.
- Detect and fix **data quality issues** across API-fed datasets before they reach reporting models.
- Run **post-deployment validation** on every pipeline change, acting as my own QA before KPIs reach management dashboards.
- Write and maintain **technical documentation** of pipelines, data models and integration logic for internal handover and continuity.
- Work under **agile methodologies**, iterating internal analytics tooling with operations and product teams.

Legal & Data Assistant

Mar 2020 – Jan 2022

CIFUENTES & FERNÁNDEZ LAW FIRM · TANDIL

- Analyzed an **undocumented legacy process** (manual spreadsheet tracking of court case files) and designed and implemented the firm's **first SQL database** from scratch — schema design, data migration from spreadsheets, and validation of migrated records.
- Supported the processing of executive court proceedings for banking clients, handling sensitive structured data.

EDUCATION

★ Bachelor's in Technology Management (2019 – Present)

UNICEN – FACULTY OF ECONOMIC SCIENCES, TANDIL

Final-year student. Core focus: data-driven process optimization, technology strategy, innovation management, and organizational systems design. Combines data engineering with business decision-making frameworks.

Public Accounting Degree (2019 – Present)

UNICEN – FACULTY OF ECONOMIC SCIENCES

Complementary formation in financial analysis, auditing, cost accounting, and business economics — directly applied to KPI reporting and budget modeling.

Bilingual High School – Economics & Business (2010–2015)

COLEGIO SANTO DOMINGO EN LA SIERRA, TANDIL

Academic Exchange Program (Apr–Jul 2015)

DE LA SALLE HIGH SCHOOL, MINNEAPOLIS, MN

Selected for academic excellence. Full immersion program, 4 months.

KEY PROJECTS & ACHIEVEMENTS

MIGRATION

Migrated a law firm's case-tracking process from unstructured spreadsheets to a relational SQL database — schema design, data cleansing, migration and record validation, replacing the firm's entire manual workflow.

ETL

Automated KPI monitoring system integrating REST APIs over connected machinery data, adopted directly by management for operational decision-making.

CAMBRIDGE

Outstanding results in 8 IGCSE exams; awarded First Certificate by University of Cambridge.
